2018-19 Tifton Bull Evaluation Program 84 Day Report

January 1, 2019

To: Consignors and Other Interested Parties

From: 
Jacob Segers, Ext. Animal Scientist – Beef Cattle

Happy New Year! Enclosed is the 84 day report on the bulls at Tifton. Bulls have continued to perform very well. The overall average gain was 3.79 pounds per day this 28-day period while maintaining a cumulative average daily gain of 4.36 for the 84 days they've been on test. The weight gains for the last 28 days ranged from 5 to 160 pounds; the 28-day ADG ranged from 0.18 to 5.71 pounds; and the actual weights taken Tuesday morning ranged from 958 to 1,445 pounds.

We are still missing some performance data on a few bulls and/or registration certificates. When we receive your information, the 84 day performance information will be made available online. In addition, ultrasound scans will be taken next on January 17th. Bulls without registration papers on file or 205 day adjusted weaning weights will be scanned as commercial and the information will not be included in their EPD profile.

Please mark your calendars for March 5 and 6 for the Tifton Beef Cattle Short Course and Performance Tested Bull Sale. An outstanding set of bulls will be offered and we look forward to seeing you there. As always, feel free to contact Grace, Mike or myself at the numbers above if you have question, requests or just want an update on your bulls.

The Tifton Bull Evaluation Center is open for visitors between the hours of 8 a.m. to 5 p.m., Monday - Friday. If you wish to visit on the weekends, please call Mike Keeler at 229-831-5416. Also, for advanced viewing of reports, please visit our website, ugabef.com.

Upcoming dates:

- January 17 – Ultrasound bulls
- January 28 & 29 – Off test weights
- February 13 – Semen test sale bulls
- March 5 - Tifton Beef Cattle Short Course
- March 6 – 61st Annual Tifton Bull Evaluation Sale
