# 2018-19 Tifton HERD Program Report 1

October 23, 2018

To: Consignors and Other Interested Parties

From:   
Jacob Segers, Ext. Animal Scientist – Beef Cattle

The 20th annual HERD program at the Tifton Bull Evaluation Center in Irwinville is under way. The beginning of this month, we received 150 heifers. A big thanks to members of the HERD Team for their help with processing upon arrival and during our first workday today. Once again, we tested all heifers for the presence of Persistently Infected BVD. We're pleased to report that all heifers were negative.

Since this is the first report you have received, some explanation of the terms is in order. Actual Frame is the frame score based on the hip height at the October 23 weigh day. Estimated Mature Weight is calculated from actual frame score. This is only an estimate, but it will give you an idea of what size these heifers should be. Target Weight is calculated from the estimated mature weight. For optimum breeding, heifers should weigh at least 65% of mature weight by the time they are 15 months of age.

As a reminder, we follow guidelines for all formulas and chute side docility scoring from the Beef Improvement Federation. The 2018 guidelines can be found on their website, [beefimprovement.org](http://beefimprovement.org)

Our synchronization program includes the use of CIDRs, GnRH, and Lutalyse. **The HERD Team has selected SS Niagara Z29 as the primary sire and MCR Horizon 081 for those heifers closely related to Niagara.** The synchronization program will be as follows:

- November 7 – CIDRs are inserted
- November 21 – CIDRs are removed
- December 7 – Lutalyse is injected
- December 10 – Time breed all heifers; inject GnRH at breeding
- December 18 – Cleanup bulls placed with the heifers

The Evaluation Center is open for visitors on weekdays between the hours of 8 a.m. and 5 p.m. You are welcome to visit the station during these hours. If you wish to visit on the weekends, please call Mike Keeler at 229-831-5416. Feel free to visit our website **ugabeeff.com** for early posting of reports and a complete schedule of activities planned for the program. Please contact us if you have any questions.

### **Upcoming dates:**

- **November 1 - Deadline for HERD entries at Calhoun**
- **November 7 - Report 2 - Tifton HERD Program**
- **December 7 - 49<sup>th</sup> Calhoun Bull Evaluation Sale**

## 2018 - 19 Tifton H.E.R.D. Program Consignors

Doc.: Chute side docility score. Based off 2018 BIF guidelines of 1 - 6.																	
BWT: Actual birthweight.																	
Frame Score: Based on the hip height at the 10/23/18 weighday.																	
Target Weight: Calculated from the estimated mature weight. For heifers to be cycling and able to conceive, they should weigh at least 65% of mature weight by the time they are 15 months of age.																	
WDA: Weight per Day of Age
