2018-19 Tifton HERD Program Report 2

November 7, 2018

To: Consignors and Other Interested Parties

From: 
Jacob Segers, Ext. Animal Scientist – Beef Cattle

Enclosed is Report 2 on the HERD heifers worked November 7th. Special thanks to Dr. Lee Jones and Dr. Pedro Melendez of the UGA College of Veterinary Medicine for doing the reproductive tract maturity scores and pelvic area measurements.

One heifer had a Reproductive Tract Maturity Score less than 2 AND an actual pelvic measurement of less than 140 sq. cm. One heifer had a Reproductive Tract Maturity Score of less than 2. Eighteen heifers had actual pelvic measurements of less than 140 sq. cm. These heifers are no longer sale eligible and will not appear on this report. A separate report will be sent to the affected consignors.

The quality of the females in the program is extremely high. As a whole, they are healthy and doing well.

CIDRs were also inserted today. Weights on the heifers ranged from 610 to 1,035 pounds. The actual pelvic measurements ranged from 104.50 to 224.00 sq. cm., and the reproductive tract maturity scores ranged from 1 to 5.

Our synchronization program will continue as follows:

- November 21 – CIDRS are removed.
- December 7 – Lutalyse is injected.
- December 10 – Time breed all heifers; inject GnRH at breeding.
- December 18 – Cleanup bulls are placed with the heifers (52 days).

NOTE: If you plan to provide semen from an alternative bull, it must be delivered to Irwinville ASAP!

Reminder: The 49th Calhoun Bull Evaluation Sale is December 7th. Be on the lookout for the sale catalog and videos to be posted on our website.

Feel free to visit our website *ugabeeef.com* for early posting of reports and a complete schedule of activities planned for the program. Please contact us if you have any questions.
