2018-19 Tifton HERD Program Report 3

December 10, 2018

To: Consignors and Other Interested Parties

From: _____

Jacob Segers, Ext. Animal Scientist – Beef Cattle

Enclosed is the 3rd report on the HERD heifers at Tifton. The heifers were AI'd today, and we're hoping for a high conception rate. Weights were recorded on the heifers this past Friday afternoon when the lutalyse injections were given. Please bear in mind that following a 17-day synchronization protocol, decreased gain is expected. So, females that have not gained or potentially lost some weight are not a reason for concern at this time. Overall, health continues to be good, and the heifers are doing well. As always, if there is a reason for you to be concerned about one of your consignments, you will be contacted by a member of our team. Cleanup bulls will be turned in on December 18, and they will be removed on February 1, 2019. Please remember that as in the past two years, we will forego the January weight period to minimize the stress on the heifers during their early pregnancy. Pregnancy examination will be done on March 13, 2019 to determine which heifers are safe to the AI date and a report will follow at that time. If you have any questions, please feel free to contact me or Grace at the numbers listed above.

Other important dates:

February 13 *Northeast Georgia Beef Cattle Short Course*
February 14 *Athens Focus on EPD's Bull Sale*
March 5 *Tifton Beef Cattle Short Course*
March 6 *60th Tifton Bull Evaluation Sale*
April 16 *Tifton HERD Sale*
May 28 *Calhoun Beef Cattle Reproductive Management Workshop*
