Greetings,

April 26, 2021

From: Jason Duggin  
Jason Duggin, Extension Beef Specialist

Enclosed are the rules and nomination form for the 2021-22 Georgia Bull Evaluation Programs at Calhoun and Tifton. Please be sure to read over the rules very carefully.

The Bull Test Advisory Committee, along with program management has made the decision to move the test from 112 days to 84 days. This will adjust delivery dates two weeks at both program locations. This should help buffer increased feed cost and allow for additional marketing time prior to sale day.

**A few other friendly reminders for entry and rules updates:**

- You must send a \$50 nomination fee per bull along with the entry form.
- **The deadline for nominations in Calhoun is June 1, 2021. Tifton is September 1st, 2021.**
- Both nomination /entry deadlines for Calhoun and Tifton are postmark dates.
- Per the rules upon delivery: bring a fully completed delivery form (mailed to you upon acceptance of entry), valid health certificate, health form, and the original signed registration paper. Please submit all performance data, parentage and genomic samples info necessary to your respective breed association in plenty of time so that this will not be delayed.
- **New this year:** At time of delivery, 2/3 of the total test fee will be due. Consignors will be invoiced at a later date for the remaining 1/3.
- All bulls must have official adjusted 205-day weights. This means that you will have to participate in your breed associations performance records program.
- It is essential that you follow the pre-condition program laid out in the rules.
- If feasible, it is ideal for producers to have their GE-EPDs in hand when making decisions about which bulls to consign particularly for calving ease associated traits.

If you have questions, please call or email our team. We look forward to testing your bulls during the 2021-22 program year!
