Grace Nyhuis, Program Coordinator III

Enclosed is the 56-day report on the bulls at Tifton. We have reached the halfway point in the Bull Evaluation at Tifton. The bulls gained 3.88 pounds per day this period while gaining 4.16 pounds for the 56 days they've been on test.

- **We are still missing some performance data necessary for ultrasound!*
- **Double check your bulls have genomic enhanced EPDs and that they have parents qualified status. Example #1: Angus bulls will have Parents Qualified in the upper left portion when viewing online along with the test submitted.*

Birth Date: 09/10/2018	Tattoo: 847
Parentage: SNP	Genomic: Angus GS
Parents Qualified	

- **Example #2: Simmental / SimAngus will have an acronym on the right middle portion- "PQB" (parents qualified both). PQS means the dams of the bulls have not been tested or no results. These bulls are not yet sale eligible. If you have bulls and are not sure about their genomic test results, please contact us as soon as possible.*
