

October 25, 2021

To: Tifton H.E.R.D. Consignors

From: 
Francine Henry, Ph.D., Ext. Beef Specialist

The 23rd annual H.E.R.D. Program at the Tifton Bull Evaluation Center in Irwinville is under way. Earlier this month, we received 169 heifers. A big thanks to the Agents on the HERD Team for their help with processing upon arrival and during our first workday today. Once again, we tested all heifers for the presence of Persistently Infected BVD. We're pleased to report that all heifers were negative.

Since this is the first report you have received, some explanation of the terms is in order. Actual Frame is the frame score based on the hip height at the October 25 weigh day. Estimated Mature Weight is calculated from actual frame score. This is only an estimate, but it will give you an idea of what size these heifers should be. Target Weight is calculated from the estimated mature weight. For optimum breeding, heifers should weigh at least 65% of mature weight by the time they are 15 months of age.

As a reminder, we follow guidelines for all formulas and chute side docility scoring from the Beef Improvement Federation. The 2021 guidelines can be found on their website, beefimprovement.org

Our synchronization program includes the use of CIDRs, GnRH, and Lutalyse. **The HERD Team has selected G A R Sure Fire as the primary sire and Baldrige Marksman for those heifers closely related to Sure Fire.** The synchronization program will be as follows:

- November 1 – CIDRs are inserted
- November 24 – CIDRs are removed
- December 10 – Lutalyse is injected
- December 13 – Time breed all heifers; inject GnRH at breeding
- December 21 – Cleanup bulls placed with the heifers

The Evaluation Center is open for visitors on weekdays between the hours of 8 a.m. and 5 p.m. You are welcome to visit the station during these hours. Please call Mike Keeler at 229-831-5416. Feel free to visit our website ugabeef.com for early posting of reports and a complete schedule of activities planned for the program. Please contact us if you have any questions.

Upcoming dates:

- November 1 - Deadline for H.E.R.D. entries at Calhoun
- November 10 – Report 2 – Tifton H.E.R.D. Program
- December 3 – Calhoun Bull Evaluation Sale

Averages: 169 Heifers																		
				10/13/20	706	1.93	762	377	2.03	4.6	1149	747	1.1			69		
Doc.: Chute side docility score. Based off 2021 BIF guidelines of 1 - 6.																		
BWT: Actual birthweight																		
Frame Score: Based on the hip height at the 10/25/21 weighday.																		
Target Weight: Calculated from the estimated mature weight. For heifers to be cycling and able to conceive, they should weigh at least 65% of mature weight by the time they are 15 months of age.																		
WDA: Weight per Day of Age
