

November 11, 2021

To: Tifton H.E.R.D. Consignors

From:   
Francine Henry, Ph.D., Ext. Beef Specialist

Enclosed is Report 2 on the HERD heifers that were worked November 10<sup>th</sup>. Special thanks to Dr. Lee Jones of the UGA College of Veterinary Medicine and his students for doing the reproductive tract maturity scores and pelvic area measurements.

As a result, 24 heifers have now been moved to a “non-sale eligible report” and will not be posted with this report. The affected consignors have been notified. 2 heifers had Reproductive Tract Maturity Scores (RTMS) of less than 2. 16 heifers had actual pelvic measurements of less than 140 sq. cm. 5 heifers had both a RTMS 1 and were less than 140 sq cm. And, one heifer was found to be a freemartin.

The quality of the females in the program is extremely high. As a whole, they are healthy and doing well.

CIDRs were also inserted yesterday by Agents from the HERD Team. Weights on the heifers ranged from 572 to 1,085 pounds. The actual pelvic measurements ranged from 115.00 sq cm to 201.50 sq. cm., and the RTMS ranged from 0 to 5.

Our synchronization program will continue as follows: **The HERD Team has selected G A R Sure Fire as the primary sire and Baldrige Marksman for those heifers closely related to Sure Fire.**

- November 24 – CIDRs are removed
- December 10 – Lutalyse is injected
- December 13 – Time breed all heifers; inject GnRH at breeding
- December 21 – Cleanup bulls placed with the heifers

**NOTE: If you plan to provide semen from an alternative bull, it must be delivered to Irwinville ASAP!**

**Reminder: The Calhoun Bull Evaluation Sale is December 3<sup>rd</sup>. The sale catalog and videos of the bulls can be found on our website.**

Feel free to visit our website ***ugabeef.com*** for early posting of reports and a complete schedule of activities planned for the program. Please contact us if you have any questions.
