## 2024-25 Tifton HERD Program Amended Report 2

To: Tifton H.E.R.D. Consignors

From: 

Lawton Stewart, Ph.D., Extension Beef Specialist

Enclosed is an Amended Report 2 on the HERD heifers that were worked yesterday. These heifers were originally ruled out based on pelvic areas below 140 sq cm. Due to the large number of heifers (as a percentage of the total) that were below the threshold, the team met and decided to recheck this group. Special thanks to Drs. Angie McDaniel and Brad Heins of the UGA College of Veterinary Medicine for performing the pelvic area measurements.

As a result, 22 heifers will now be moved to the “sale eligible report” and posted online. Of the remaining five heifers, one heifer had a reproductive tract maturity score of 1, three heifers had pelvic measurements of less than 140 sq. cm, and one is removed for other reasons.

All heifers received a CIDR on 13 November and will continue in the breeding protocol. Our synchronization program will continue as follows: **The HERD Team has selected Baldrige Command C036 as the primary sire and KCF Bennett Constiution for those heifers closely related to Command.**

- November 27 – CIDRs are removed
- December 13 – Lutalyse is injected
- December 16 – Time breed all heifers; inject GnRH at breeding
- December 23 – Cleanup bulls placed with the heifers

**NOTE: If you plan to provide semen from an alternative bull, it must be delivered to Irwinville ASAP! Please let us know prior to delivery.**

**Reminder: The Calhoun Bull Evaluation Sale is December 6<sup>th</sup>. The sale catalog and sale videos can be found on our website.**
