**32nd Edition**  
**Focus on Genomic**  
**Enhanced EPDs Bull Sale**  
**Thursday • February 13, 2025 • Noon**

**UGA Livestock Instructional Arena**  
**2600 S. Milledge Ave., Athens, Georgia**

*Broadcast by:*

To view the catalog and videos  
online, visit  
[www.ugabeef.com/focusonepds](http://www.ugabeef.com/focusonepds)

## *Details for Online Bidding*

*Internet bidding is available through LiveAuctions.tv. You must register to bid at [www.liveauctions.tv](http://www.liveauctions.tv). If you need additional help, contact Shelly Burden at 903/386-7191 or [shelly@liveauctions.tv](mailto:shelly@liveauctions.tv).*

## *Viewing Bulls and Heifers*

*Videos should be posted shortly after February 1, 2025, on LiveAuctions.tv and [www.ugabeef.com/focusonepds](http://www.ugabeef.com/focusonepds). Animals may be viewed at the Eatonton Beef Research Unit (1508 Godfrey Road, NW, Eatonton, GA) by appointment prior to February 11. Contact Kip McMillan at 706/816-2932.*

*Starting Tuesday, February 11, through the completion of the sale, cattle will be available for viewing at the UGA Livestock Instructional Arena.*

# 32nd Edition Focus on Genomic Enhanced EPDs Bull Sale

Thursday • February 13, 2025 • Noon

UNIVERSITY OF  
**GEORGIA**

College of Agricultural & Environmental Sciences  
Department of Animal and Dairy Science

Dear Beef Producers,

On behalf of the Department of Animal and Dairy Science (ADS), I would like to extend a heartfelt welcome to all attending the 32nd Edition Focus on Genomic Enhanced EPDs Bull Sale. We are continuing to place an emphasis on indexes that combine multiple traits that include calving ease, growth, and carcass quality because profitability requires a live calf that grows well, and carcass quality is extremely important to the people who buy your calves.

From a departmental standpoint, several of our faculty are investigating the differences in profitability relative to cow size as well as working on an Artificial Intelligence generated body condition score to accurately assess an animal's nutritional status. We continue to conduct research on animal health using individual animal feed and water intake, factors impacting reproductive performance, forage management, and the impact of heat stress on feedlot cattle. We are thankful to the Georgia Commodity Commission for Beef for supporting many research efforts and allowing us to upgrade the Double Bridges Farm in Athens and the Eatonton Beef Feedlot. Both are using our new C-Lock individual animal feed intake system, with the Double Bridges Feedlot being able to measure water intake as well. The Down Under Farm across from the Livestock Instructional Arena in Athens is being fenced this winter, with the expectation that our students will have cattle there during Fall Semester, 2025. This property is going to be the base for a new advanced beef production course. We are continuing to make repairs in Alapaha due to the hurricane, as well as improvements to all our farms.

The bulls and females in the sale are products of our beef program at Eatonton. We continue to be very selective in the bulls we offer in the sale. These cattle are sired by some of the leading bulls in the Angus breed, and we feel confident that you will be satisfied with our product. Once again, a special attraction of the sale will highlight three registered Angus heifers. These heifers are sired by Deer Valley Optimum 9246 and GAR Dual Threat. We believe that these heifers will excel in multiple traits, and we are donating the proceeds to the Block and Bridle Scholarship Fund, the Block and Bridle Support Fund, and the UGA Cattlemen's Association Support Fund. **All of the proceeds from these heifers go directly to supporting our students, so please consider adding these to your herd.**

My thanks and congratulations go to Kip McMillan, Chad Westmoreland, Caleb Williams, Tim Hunnicutt, Chad Davis, and Mark Gunter, Jr., at Eatonton for developing this fine set of bulls and females. We take pride in their product, and we are confident that the animals purchased will work for you. If you have any questions, please contact any one of us. As always, you may contact me at [ffluharty@uga.edu](mailto:ffluharty@uga.edu) or at 706-542-1017.

Sincerely,

Francis L. Fluharty  
Professor and Head

# PERFORMANCE LEGEND

**Birth Weight (BW)** - Actual birth weight.

**Adjusted 205 Day Weaning Weight (AWW)** - Standard weaning weight adjusted for age of dam.

**Expected Progeny Difference (EPD)** is the prediction of how future progeny of each animal are expected to perform relative to the progeny of other animals listed in the respective breed's database. EPDs listed in this catalog were obtained from the breed associations, and they are expressed in units of measure for the trait, plus or minus. Interim EPDs may appear on young animals when their performance has yet to be incorporated into the National Cattle Evaluation (NCE) procedures. This EPD will be preceded by an "I" and may or may not include the animal's own performance record for a particular trait, depending on its availability, appropriate contemporary grouping, or data edits needed for NCE. Please keep in mind that EPDs can change each time breed associations update their data. EPDs should not be used to compare bulls of different breeds.

Birth, Weaning, Yearling and Milk EPDs are expressed in pounds of calf. Differences in EPDs between two bulls within the same breed indicate the expected difference between their calves. A bull with a weaning weight EPD of +40 would be expected to produce calves that averaged 10 pounds heavier at weaning compared to calves produced by a bull of the same breed with a +30 weaning weight EPD. The same is true for birth and yearling EPDs. Milk EPDs are an indication of the added weight at weaning of a bull's daughter's calves due to the bull's transmission of milking ability.

**Calving Ease Direct (CED)** is expressed as a difference in percentage of unassisted births, with a higher value indicating greater calving ease in first-calf heifers. It predicts the average difference in ease with which a sire's calves will be born when he is bred to first-calf heifers.

**Birth Weight (BW)**, expressed in pounds, is a predictor of a sire's ability to transmit birth weight to his progeny compared to that of other sires.

**Weaning Weight (WW)**, expressed in pounds, is a predictor of a sire's ability to transmit weaning growth to his progeny compared to that of other sires.

**Yearling Weight (YW)**, expressed in pounds, is a predictor of a sire's ability to transmit yearling growth to his progeny compared to that of other sires.

**Scrotal Circumference (SC)**, expressed in centimeters, is a predictor of the difference in transmitting ability for scrotal size compared to that of other sires.

**Docility (DOC)**, is expressed as a difference in yearling cattle temperament, with a higher value indicating more favorable docility. It predicts the average difference of progeny from a sire in comparison with another sire's calves. In herds where temperament problems are not an issue, this expected difference would not be realized.

**Maternal Milk (MILK)** is a predictor of a sire's genetic merit for milk and mothering ability as expressed in his daughters compared to daughters of other sires. In other words, it is that part of a calf's weaning weight attributed to milk and mothering ability.

**Carcass Weight (CW)**, expressed in pounds is a predictor of the differences in hot carcass weight of a sire's progeny compared to progeny of other sires.

**Marbling (MARB)**, expressed as a fraction of the difference in USDA marbling score of a sire's progeny compared to progeny of other sires.

**Ribeye Area (RE)**, expressed in square inches, is a predictor of the difference in ribeye area of a sire's progeny compared to progeny of other sires.

**Fat Thickness (FAT)**, expressed in inches, is a predictor of the differences in external fat thickness at the 12th rib (as measured between the 12th and 13th ribs) of a sire's progeny compared to progeny of other sires.

**\$Value Indexes** are multi-trait selection indexes, expressed in dollars per head, to assist beef producers by adding simplicity to genetic selection decisions. The \$Value is an estimate of how future progeny of each sire are expected to perform, on average, compared to progeny of other sires in the database if the sires were randomly mated to cows and if calves were exposed to the same environment.

**Weaned Calf Value (\$W)**, an index value expressed in dollars per head, is the expected average difference in future progeny performance for preweaning merit. \$W includes both revenue and cost adjustments associated with differences in birth weight, weaning direct growth, maternal milk, and mature cow size.

**Beef Value (\$B)**, an index value expressed in dollars per head, is the expected average difference in future progeny performance for postweaning and carcass value compared to progeny of other sires.

**Combined Value (\$C)**, an index value, expressed in dollars per head, which includes all traits that make up both Maternal Weaned Calf Value (\$M) and Beef Value (\$B) with the objective that commercial producers will replace 20% of their breeding females per year with replacement heifers retained within their own herd. The remaining cull heifer and steer progeny are then assumed to be sent to the feedlot where the producers retain ownership of those cattle and sell them on a quality-based carcass merit grid. Expected progeny differences (EPDs) directly influencing a combined index: calving ease direct (CED) and maternal (CEM), weaning weight (WW), yearling weight (YW), maternal milk (Milk), heifer pregnancy (HP), docility (DOC), mature cow weight (MW), foot angle (Angle), claw set (Claw), dry matter intake (DMI), marbling (Marb), carcass weight (CW), ribeye area (RE) and fat thickness (Fat).

**Percent Rank (%)** – This number is the ranking of the average breed genetic index value for the respective trait as a percentile basis from 1 to 100. This means the lower the number, the better the ranking. For example, if the percent rank is 10%, it is in the top 10% of the breed for that trait. **Traits within the top 25 percentile are highlighted in red.**

**\*Adj. % IMF** – The percent intramuscular fat (marbling) adjusted to 365 days of age. Heritability of marbling is in the moderate range.

**\*Adj. Rib Fat** – Backfat measured in inches adjusted to 365 days of age.

**\*Adj. REA** – Ribeye area measured in square inches and adjusted to 365 days of age.

*\* Individual ultrasound measurements are adjusted to 365 days for bulls and 390 days for heifers.*

**Genomic Enhanced EPDs shown in this catalog were current as of December 24, 2024. Yearling carcass and performance data should be available sale day. Current EPDs may be viewed anytime at [www.angus.org](http://www.angus.org).**

**All registered animals are genetically free or tested free of known genetic defects.**

## Buyer's Choice of Three Registered Angus Open Heifers

“Once again, a special sale highlight will be three registered Angus heifers, with the proceeds going directly to supporting our students. We believe these heifers will excel in multiple traits, and we are donating the proceeds to the Block and Bridle Scholarship Fund, the Block and Bridle Support Fund, and the UGA Cattlemen’s Association Support Fund.

All of the proceeds from these heifers go directly to supporting our students, so please consider adding these females to your herd.”

- Dr. Francis L. Fluharty  
Professor and Head  
UGA Animal and Dairy Science

Thanks to the following individuals for their purchases of the Buyer’s Choice heifers in previous sales:

2024 - Arnold S. “Beau” Kaye, Danielsville, GA; Will Schofield, Hall County Schools, HCSD Farms, Gainesville, GA

2023 - Andy Landers, Watkinsville, GA; Josh Moore, Dawsonville, GA; Eric Pope, Watkinsville, GA

2022 - Arnold S. “Beau” Kaye, Danielsville, GA; David Williams, Watkinsville, GA

### **Details for Online Bidding**

*Internet bidding is available through LiveAuctions.tv. You must register to bid at [www.liveauctions.tv](http://www.liveauctions.tv). If you need additional help, contact Shelly Burden at 903/386-7191 or [shelly@liveauctions.tv](mailto:shelly@liveauctions.tv).*

### **Viewing Bulls and Heifers**

*Videos should be posted shortly after February 1, 2025, on LiveAuctions.tv and [www.ugabeef.com/focusonepds](http://www.ugabeef.com/focusonepds).*

*Animals may be viewed at the Eatonton Beef Research Unit (1508 Godfrey Road, NW, Eatonton, GA) by appointment prior to February 11. Contact Kip McMillan at 706/816-2932.*

*Starting Tuesday, February 11, through the completion of the sale, cattle will be available for viewing at the UGA Livestock Instructional Arena*

**Thank you for your continued support of our students and  
our programs!**

# TERMS, CONDITIONS, & GENERAL SALE INFORMATION

---

**TERMS** of the sale are cash unless prior credit arrangements are established between buyer and seller. Settlements are to be made with the clerk immediately after the conclusion of the auction. Parties unknown to the sale management desiring to settle by personal check, should bring a letter of identification from their banker.

**BIDDING & DISPUTES** – Each animal will be sold to the highest bidder. The auctioneer in charge will settle any disputes which might arise, and his decision will be final. The auctioneer shall have the right to refuse bids from anyone who has a previous record of default in payment.

**PURCHASER'S RISK** – Each animal becomes the property of the purchaser when sold and will be maintained at the purchaser's risk.

**MORTALITY INSURANCE** is available. Buyers wishing to insure their purchases may do so by contacting Cannon Marketing Company, Inc.

**HEALTH** – All animals are eligible for interstate shipment, except as otherwise announced. Interstate health certificates will be available for each animal.

It is the responsibility of the buyer to know the health restrictions of his/her state and to be aware of the possibility of any subsequent testing of any animals purchased through this sale as required by law.

**REGISTRATION** – A certificate of registry, properly transferred, will be furnished by the seller on each registered animal sold. Any exceptions will be announced from the auction box.

**BREEDING GUARANTEE** – All bulls have been semen tested and have successfully passed. Bulls are guaranteed to be breeders with the exception of:

(A) Injury or disease occurring to the animal after the sale.

(B) Gross negligence or willful misconduct on the part of the purchaser.

This guarantee is a contract between the buyer and the seller. All other parties are acting as agents or representatives only. Any legal action that may in extreme cases have to be taken must be between the buyer and the seller and will in no way involve Cannon Marketing Company, Inc.

**ANNOUNCEMENTS** made from the auction block on sale day shall take precedence over information printed in the catalog. It is therefore the buyer's responsibility to pay attention to any such announcements.

**ABSENTEE BIDS** will be handled in a most confidential manner if you are unable to attend the sale. Please contact Cannon Marketing Company, Inc., if you need assistance.

**LIABILITY** – All persons attend the sale at their risk, and the seller and the sale manager assume no liability, legal or otherwise, for any accidents occurring in, on, or about the premises. Cannon Marketing Company, Inc., is acting only as a medium between buyer and seller and is not in any way responsible for any failure on the part of either party to live up to his obligations. The information contained in this catalog and any subsequent publications was provided to the sale management by the seller – therefore, the sale management assumes no responsibility or liability for the accuracy of information contained herein or for any representations or warranties of the seller, whether written or oral, express or implied. Neither does Cannon Marketing Company, Inc., assume any financial obligations to collect or enforce collection of any monies between parties. Any legal action must be between buyer and seller. The buyer must look to the seller for fulfillment of all guarantees and representations made hereunder.

*Genomic Enhanced EPDs shown in this catalog were current as of December 24, 2024. Yearling carcass and performance data should be available sale day. Current EPDs may be viewed anytime at [www.Angus.org](http://www.Angus.org).*
