2026-27 Tifton H.E.R.D. Program Report 1

To: Tifton H.E.R.D. Consignors

From: Pedro Carvalho
Pedro Carvalho, Ph.D., Extension Beef Specialist

The 28th annual H.E.R.D. Program at the Tifton Bull Evaluation Center in Irwinville is under way. Earlier this month, we received 199 heifers. A big thanks to the County Agents on the H.E.R.D. Team for their help with processing upon arrival and during our first workday yesterday.

Since this is the first report you have received, some explanation of the terms is in order. Estimated Mature Weight is calculated from actual frame score (based on hip height taken on 10/27). This is only an estimate, but it will give you an idea of what size these heifers should be. Target Weight is calculated from the estimated mature weight. For optimum breeding, heifers should weigh at least 65% of mature weight by the time they are 15 months of age.

Our synchronization program includes the use of CIDRs, GnRH, and Lutalyse. **The H.E.R.D. Team has selected Yon Discipline and G A R Apex as the two AI sires.** If you have a preference on who your heifer's are AI'd to, please let us know ASAP.

Upcoming programmatic dates:

- November 11 – CIDRs are inserted
- November 25 – CIDRs are removed
- December 11 – Lutalyse is injected
- December 14 – Time AI all heifers; inject GnRH at breeding
- December 21 – Cleanup bulls turned out with the heifers
- *January 19 – Heifers are ultrasounded for AI pregnancy diagnosis
- *April 13 – Final ultrasound on all heifers to determined final pregnancy status

*Dates adjusted from previous years.

Upcoming dates:

- November 1 - Deadline for H.E.R.D. entries at Calhoun
- November 11 – Report 2 – Tifton H.E.R.D. Program
- December 4 – Calhoun Bull Evaluation Sale

An Equal Opportunity, Affirmative Action, Veteran, Disability Institution
