2026-27 Tifton HERD Program Report 2

To: Tifton H.E.R.D. Consignors

From:_____
Pedro Carvalho, Ph.D., Extension Beef Specialist

Enclosed is Report 2 on the H.E.R.D. heifers that were worked yesterday. Special thanks to Drs. Alejandro Ojeda-Rojas and Angie McDaniel of the UGA College of Veterinary Medicine for doing the reproductive tract maturity scores and pelvic area measurements.

As a result, 3 heifers have now moved to non-sale eligible. Those consignors have been notified. Two heifers had a reproductive tract maturity score (RTMS) of a 1, and one heifer was a freemartin.

CIDRs were also inserted yesterday. Weights on the heifers ranged from 600 to 1,080 pounds. The actual pelvic measurements ranged from 154.00 sq cm to 297.50 sq. cm., and the RTMS ranged from 1 to 5. As a group, the heifers are healthy and gaining an average of 1.5 lbs per day. We have slightly adjusted their feed intake to allow for more potentioal growth and will adjust accordingly when weights are taken on December 11th.

Our synchronization program continues as follows:

- The H.E.R.D. Team has selected Yon Discipline and G A R Apex as the two AI sires
- **If you have a special request from one of these two bulls, or plan to provide semen from another bull, please notify Grace by this Monday (Nov 16th) at 5PM. We need to make final agrangements with the semen company.**

Upcoming programmatic dates:

- November 11 – CIDRs are inserted
- November 25 – CIDRs are removed
- December 11 – Lutalyse is injected
- December 14 – Time AI all heifers; inject GnRH at breeding
- December 21 – Cleanup bulls turned out with the heifers
- *January 19 – Heifers are ultrasounded for AI pregnancy diagnosis
- *April 13 – Final ultrasound on all heifers to determined final pregnancy status

*Dates adjusted from previous years.

Reminder: The Calhoun Bull Evaluation Sale is December 4th. The sale catalog and videos can be found on ugabeef.com/bulltest.

Doc.: Chute side docility score. Based off 2026 BIF guildlines of 1 - 6.																					
Target Weight: Calculated from the estimated mature weight. For heifers to be cycling and able to conceive, they should weigh at least 65% of mature weight by the time they are 15 months of age.																					
WDA: Weight per Day of Age																					
Reproductive Tract Maturity Score (RTMS):			Score	Uterine Horns																	
			1	Immature <20 mm diameter; no tone																	
			2	20 - 25 mm diameter; no tone																	
			3	25 - 30 mm diameter; slight tone																	
			4	30 mm diameter; good tone																	
			5	>30 mm diameter; good tone - erect
